### Review Summary

- Training at the Brain Master Training Center (BMC) is delivered in a supportive environment, where the majority of learners develop proficient skills and knowledge in accountancy and finance, enabling most of them to achieve their qualifications on time.
- BMC's strengths include implementing effective training strategies and assessments that adhere to the awarding body's standards and providing targeted support to enhance learners' vocational skills. Nevertheless, BMC needs to further improve the effectiveness of its internal verification and assessment moderation processes.
- The leadership and management team monitors the Centre's performance through purposeful self-assessment practices. The next step is to better utilise the outcomes of this self-assessment process to enhance the overall quality of provision.
- BMC has been rated 'Good' in all aspects during its review and will develop an action plan to enhance its performance based on the review recommendations.
