Review Summary

- The school provides a stimulating learning environment characterised by a cohesive school community and small number of students. Students demonstrate exemplary behaviour, and they are engaged in a wide range of school activities with enthusiasm, enjoyment and confidence that enrich their experiences and foster their talents.
- School leadership adopts a collaborative approach to continuous improvement of school performance, excelling in the implementation of development plans and projects as well as encouraging its staff to be creative.
- The school develops staff performance by providing their required training needs. This has resulted in teachers employing outstanding teaching strategies and effective assessment methods in the majority of lessons, particularly in Cycle 1 and mathematics lessons, leading to students achieving high academic performance standards.
- The school offers a comprehensive range of targeted remedial and enrichment programmes, aligned with effective plans, and monitors their impact on students' progress regularly.
- The school should further share its excellent practices and optimally benefit from them to enhance some Cycle 2 teachers' performance, ensuring excellence through supporting low achieving students in the lessons.
- The school was graded as 'Outstanding' when reviewed and it will draft an Action Plan based on the review recommendations given.
