Teaching, Learning
and Assessment

Leadership,
Management and
Governance

Review Summary

- The school is considered a safe and stimulating learning environment, where students enjoy school life in lessons and in various extra-curricular activities and programmes.
- The school has many positive features in various areas of schoolwork, such as students' academic achievement, personal development, and the efficiency of teaching practices.
- The school's leadership operates systematically to manage schoolwork, implementing clear procedures to achieve its goals, and ensuring that teachers receive effective training to promote teaching practices.
- The school needs to further focus on monitoring the impact of teachers' training programmes to improve teaching and learning practices, develop students' basic skills, particularly in English, and support low-achieving students in lessons, assignments, and school programmes.
- All this means that students receive good education that contributes to their growth and learning. The school will draft an Action Plan based on the review recommendations.
