Review Summary

- The school is a positive and stimulating learning environment, where students are well-behaved and participate significantly in the various school activities and programmes, while provided with an atmosphere of enjoyment and prominent personal support.
- The school has many positive, particularly students' standards in most subjects, and the development of their leadership traits in school life.
- The school's leadership operates in an organised manner to facilitate schoolwork, implementing school plans clearly to achieve its goals, as well as its evident communication with parents and local community institutions, which enhances and enriches students' experiences and diverse talents.
- The school needs to further focus its efforts on improving students' basic skills in English, supporting the low achieving students in remedial lessons and programmes, and continuing to improve the quality of teaching and learning by further monitoring the impact of teachers' training programmes on their performance in lessons.
- All this means that students will receive personal and educational support that ensures their personal development and better learning, and the school will develop an Action Plan based on the review recommendations.
