## Review Summary

- The school is considered a safe and stimulating learning environment where students receive appropriate education and positive personal care that builds up their self-confidence and contributes to their leadership roles through various school activities, programmes, and committees. Moreover, special needs students receive effective care and support.
- The school's leadership manages the workflow with awareness focusing on improvement priorities through effective planning and addressing various challenges. The school communicates positively with the stakeholders.
- The school needs to focus its efforts to acquire students with basic skills in class teaching lessons and English, and improve the performance of some teachers, particularly in utilising learning time, challenging students' abilities, and supporting them academically, particularly the low achieving students.
- All of this indicates that students will continue to receive appropriate education, and the school will draft an Action Plan based on the review recommendations.
