Governance

Review Summary

- The school provides a stimulating learning environment where students receive personal support, behave well and actively engage in classroom and extracurricular activities that develop their talents, leadership skills and motivation to learn.
- The school's leadership adopts a systematic approach to managing and developing school operations. This includes collaborative procedures, follow-up on implementation, and productive cooperation with parents and local community institutions.
- In the majority of lessons, teachers apply effective teaching strategies and foster a supportive learning environment, contributing to students achieving positive academic progress, particularly in Cycle 2.
- The school needs to further enhance students' basic skills, particularly in Class Teaching and English, by refining the academic support in lessons and school programmes and monitoring the impact of professional development programmes offered to some teachers, to further improve learning processes in lessons.
- The school is 'Good' when reviewed and will draft an Action Plan based on the review recommendations.
