

**Sh. Kalifa Bin Salman
Institute of Technology**

3 – 5 November 2025

Location
Busaiteen

School Type
Government

No. of Students
860

Grade Levels
10 - 12

Overall effectiveness

Satisfactory with Good Features

Students' Academic
Achievement

Students' Personal
Development and
wellbeing

Teaching, Learning
and Assessment

Leadership,
Management and
Governance

Review Summary

- The Institute is an attractive learning environment that encourages students in the technical track to master specialised skills, instils discipline and adherence to professional safety standards during practical lessons and motivates them to actively participate in programmes and competitions aimed at developing their creativity and innovation.
- The Institute's leadership demonstrates awareness through adopting a collaborative work system focused on development priorities, which contributed to improving overall performance at the Institute.
- Most students make good progress in acquiring specialised practical skills and apply them effectively in technical track lessons, reflecting their practical readiness and development of professional competencies.
- The Institute needs to make greater efforts to improve teaching and learning processes in general knowledge lessons while continuing to provide academic support programmes to raise students' achievement levels.
- The Institute must further monitor the impact of professional development programmes on teachers' performance in general knowledge lessons, focusing on developing teaching strategies, making better use of learning time, implementing effective assessment methods, and utilising their results to support student learning, particularly for the low achieving ones.
- All the above demonstrates that students receive continuous personal and educational support, and the Institute will develop an Action Plan based on the review recommendations.
