Governance

Review Summary

- The school provides a stimulating learning environment where students feel comfortable and adhere to school rules and regulations, supported by a set of effective personal care programmes.
- Students generally receive appropriate education, which has contributed to their progress in the majority of core and specialised subjects. The school provides suitable opportunities to develop their diverse interests and talents through the implementation of various extra-curricular activities, programmes, and events.
- The school's leadership operates appropriately in organising and managing school operations and encourages its teachers to take developmental initiatives.
- The school proactively uses positive communication channels with parents, builds bridges of cooperation with local community institutions, and promotes relationships with professional learning communities to enhance student experiences and support their learning.
- The school needs to exert more efforts to improve students' academic standards in lessons and support programmes, particularly in English.
- The school should develop teachers' professional training programmes to improve their performance and deliver lessons more effectively.
- All of the above indicates that students receive educational services and appropriate personal care that nurtures their growth and learning. The school will develop an Action Plan based on the review recommendations.
