

TUV SUD Middle East Training Center

14 December 2025

Location
Al Hidd

Learning Areas

- Health & Safety
- Quality

Total Enrolment
669

Overall Judgement **In Progress**

- TUV SUD Middle East Training Center has taken some positive actions to sufficiently address three of the recommendations, primarily through enhanced monitoring of intended learning outcomes and improved achievement record-keeping. While these efforts have sufficiently impacted the development of skills and knowledge, the remaining two recommendations are currently partially addressed.
- There remains potential to fully implement self-assessment and formalise strategic objective-setting to strengthen strategic planning. Furthermore, as the quality assurance manual has been recently revised, its full impact on the overall quality of provision is still pending full implementation and has yet to be fully realised.
- The Centre will be scheduled for a regular review on the next visit.
