

Creativity Private School

2 – 4 February 2026

Location
Manama and
Al-Janbiya

School Type
Private

No. of Students
714

Grade Levels
1 - 12

Overall effectiveness

Good with Outstanding Features

Students' Academic
Achievement

Students' Personal
Development and
wellbeing

Teaching, Learning
and Assessment

Leadership,
Management and
Governance

Review Summary

- The school demonstrates a clear ability to positively develop students' personal characteristics. Students are well-behaved and display leadership skills resulting from the quality of personal support that enhances their self-confidence, develops their talents and innovative abilities and encourages their involvement in various activities inside and outside school.
- The school leadership efficiently utilises self-evaluation results in curriculum development and promoting students' personal development, while fostering a culture of innovation and forming strong partnerships that support the school's initiatives and contribute to achieving its goals.
- Teaching and learning reflect the use of effective teaching strategies supported by stimulating resources; this enhances student engagement and interaction with learning activities and contributes to students' positive progress in developing their basic and learning skills in the majority of lessons.
- Students' standards and skills in Arabic language require further support, through improving teaching practices and organising support programmes to raise their standards and enhance their progress in a sustainable manner.
- The impact of teachers' professional development programmes requires more accurate follow-up to ensure its impact on the performance of some teachers, particularly at the secondary stage, with a focus on improving the effective use of learning time and provision of activities that are more challenging to students' abilities and consider their individual differences to a greater extent.
- The school is judged 'Good' when reviewed and will draft an Action Plan based on the review recommendations.
