

Training Centre of the Bahrain Society of Engineers

18 – 20 May 2026

Location
Juffair

Learning Areas

- Leadership, Management and Human Resource Development
- Engineering and Architecture
- Health and Safety

Total Enrolment
675

Overall effectiveness

Good

Aspect 1:
Assessment and Learners' Achievement

Aspect 2:
Learners Engagement and Support for Learning

Aspect 3:
Leadership and Management

Review Summary

- The Training Centre of the Bahrain Society of Engineers (BSETC) delivers training in a supportive and engaging learning environment, enabling most learners to acquire relevant knowledge, practical skills, and employability competencies, particularly within the engineering field, and progress successfully towards achieving their certificate in a timely manner.
- The effective implementation of training and assessment strategies, delivered by trainers with strong theoretical and practical expertise, is supported by effective learner guidance, relevant career development opportunities, and industry-related learning experiences. This approach has enabled most learners to actively engage in learning and successfully meet programme requirements.
- The leadership and management team maintains a clear strategic direction and implements comprehensive quality assurance arrangements to support the effectiveness and sustainability of the provision. The next steps are to further strengthen verification and moderation processes, enhance the level of challenge within local achievement assessments, and improve the utilisation of learners and trainers' performance analysis outcomes to better support continuous improvement and informed decision-making.
- BSETC has been rated 'Good' in all aspects and will develop an Action Plan to further enhance its performance based on the review recommendations.
