Location
Lhassay

Learning Areas
Heavy Industrial and
Construction Machinery

Total Enrolment
328

Overall effectiveness

Satisfactory

Aspect 1:
Assessment and Learners'
Achievement

Aspect 2:
Learners Engagement and
Support for Learning

Aspect 3:
Leadership and
Management

Review Summary

- Lift-Up Training Centre (LUTC) offers externally accredited vocational programmes in heavy industrial and construction machinery.
- Training is delivered in a well-resourced environment that supports practical, hands-on learning, enabling learners to gain the knowledge and vocational skills required to obtain their intended certificates and licences.
- Trainers are certified and knowledgeable, using relevant workplace examples to enhance learners' understanding. However, training and assessment strategies require further enhancement to better engage learners and challenge their abilities, particularly in theoretical components.
- Appropriate arrangements are in place to monitor staff and trainers' performance; however, more systematic and in-depth analysis of learners' performance data is required to better inform decision-making and support continuous improvement. In addition, the admission arrangements need to be systemised to ensure accurate and consistent placement of learners into appropriate programme tracks. Moreover, the self-assessment process requires more rigour, with its outcomes more effectively utilised to inform strategic planning and enhance overall provision.
- LUTC has been rated 'Satisfactory' across all Aspects and will develop an Action Plan to address the review recommendations and further improve its performance.
